

## Repository Prompts & Links

Fixed : Prompts and commands captured per module with resource locations and purposes.

Pending : Verify final SharePoint/ShareDrive URLs once repositories are provisioned.

QA Notes: Confirm all commands run in Coursera lab images; add alt text descriptors when publishing to platform.

Lesson/Video: Module 1 — Video 3 "Model Selection Criteria and Evaluation"

Prompts/Code/Commands:

- `python scripts/profile_latency.py --model bert-base-intent --target-latency-ms 200`
  - `python scripts/profile_latency.py --model gpt-small --target-latency-ms 200`
  - `python scripts/estimate_cost.py --input metrics/techcorp_baseline.json`
- Repository/Link Details:
- Location: SharePoint://TechCorp/LLM-Eval/metrics-v1/
  - Purpose: Stores evaluation scripts and baseline metrics for architecture comparison.
