

Repository Prompts & Links

Fixed : Prompts and commands captured per module with resource locations and purposes. Pending : Verify final SharePoint/ShareDrive URLs once repositories are provisioned.

QA Notes: Confirm all commands run in Coursera lab images; add alt text descriptors when publishing to platform.

Module 3 — Video 3 "Monitoring and Performance Optimization"

Prompts/Code/Commands:

- `helm upgrade --install monitoring stack/prometheus-operator -n healthtech-prod`
- `k6 run load_tests/healthtech_k6.js --vus 5000 --duration 300s`
- `python scripts/generate_alerts.py --config configs/alert-rules.yaml`

Repository/Link Details:

- Location: SharePoint://TechCorp/LLM-Observability/monitoring-stack/
- Purpose: Centralizes monitoring templates, load tests, and alert configurations for reuse across deployments.

Outstanding Needs: Replace placeholder SharePoint:// URLs with production URLs and confirm permissions before learner release.
