

11 Courses

Build, Analyze, and Refactor LLM Workflows

Optimize & Interface LLM Apps Effectively

Deploy Resilient AI Microservices with LangChain

Automate & Secure LLM Deployments

Fine-Tune & Optimize Generative AI Models

Benchmark & Optimize LLM App Performance

Validate LLM Embeddings for Production Use

Build & Adapt LLM Models with Confidence

Design & Secure LLM APIs for Scalability

Design & Present Responsible AI Solutions

Measure ML Impact & Business Value

Mohammad Wasiq

has successfully completed the online Specialization

Build Next-Gen LLM Apps with LangChain & LangGraph

Now that you have completed the Build Next-Gen LLM Apps with LangChain & LangGraph Specialization, you have mastered the complete lifecycle of production-grade LLM application development. This certificate demonstrates your job readiness in deploying enterprise AI systems. Throughout this program, you engaged with hands-on labs, AI-graded assignments, and real-world projects, gaining expertise in: architecting resilient LLM microservices with LangChain, implementing parameter-efficient fine-tuning and embeddings validation, deploying automated CI/CD pipelines with enterprise security, optimizing performance for 99.9% uptime, and measuring business impact through ROI frameworks.
